Statement of Reasons for Allowance

1. Claim 1 has been amended to include the additional method step of pumping or dropping the cementitious composition through the conduit. This amendment overcomes the rejections set forth in the office action mailed 7/8/09, as Matsumoto, Grier, or Jones do not teach this step. Further, as the references only teach the method of applying the lubricant to a metal tube in a metalworking process, there would have been no reason for one of ordinary skill in the art to further run a cementitious composition through the metal tube.
